Subject:	FERC - capturing energy savings
Date:	Friday, August 05, 2016 12:41:09 PM

All - I tired to capture some of the discussion topics from today's meeting - please review, correct and comment in the efforts of creating an accurate final list:

FERC:

- The first step - FERC will contact GSA and let them know, where and who to contact to set-up data collectors
- Provide one-line diagrams to assist
- provide a typical floor or partial floor for measurement
- Set up "financial system" to accept energy credit from utility company

GSA:

- GSA Energy would send GSA personnel to install data collectors (277 volt lighting only):
    - it takes about a week to set up
    - it will take readings for about 1 month to collect data
    - provide a final report
- Provide information on energy standard expected savings for:
    - Florescent vs. LED
    - Reduction in number of lamps
    - Daylight harvesting
    - Light Trimming
    - Occupancy sensors
    - lighting timers

Benefits:

- Establish a baseline of current energy use
- Establish a current baseline for current facilities maintenance and operating costs (eg. lamp replacement)

Thanks for your help.
